Certificate of Aluminium wire for food contact

MANFISA WIRE S.L. hereby certifies that the supplied Aluminium wire complies with the applicable requirements of the following standards, under reasonably conditions of use. However, it remains the end-user's responsibility to verify its compliance for their specific applications.

- 1.-MANFISA Aluminium wire complies with Regulation (EC) No.1935/2004 of the European Parliament, dated October 27th 2004 about not endanger human health, not bring about an unacceptable change in the composition of the food, not bring about a deterioration in the organoleptic characteristics thereof.
- 2.-MANFISA Aluminium wire complies with Regulation (EC) No. 2023/2006 of the European Parliament, dated December 22nd 2006 about good manufacturing practices for materials and articles intended to come into contact with food.
- 3.- MANFISA Aluminium wire complies with EN 602:2004 standard, “Aluminium and aluminium alloys – Wrought products – Chemical composition of semi products used for the fabrication of articles for use in contact with food”
- 4.- MANFISA uses oils in the wire production process that comply with US Food and Drug Administration FDA (21 CFR 178.3910)
- 5.- MANFISA Aluminium wire complies with Directive 94/62/CE, Article 11, Section 1 “Heavy metal concentration levels” and EN 14287 standard “Aluminium and aluminium alloys – Specific requirements on the chemical composition of products intended to be used for the manufacture of packaging and packaging components”, ensuring that the sum of Lead, Mercury, Cadmium and Hexavalent Chrome does not exceed 100 ppm
- 6.- MANFISA Aluminium wire complies with the Regulation EU 2025/351, the Regulation EU 10/2011, the Regulation EU 1416/2016 and the Regulation EU 2017/752 on plastic materials and articles intended to come into contact with food, with a maximum specific migration limit of 1 mg/Kg.
- 7.- MANFISA Aluminium is free from bisphenol A (BPA) in accordance with the Regulation EU 2024/3190 on the use of bisphenol A (BPA) and other bisphenols and bisphenol derivatives with harmonised classification for specific hazardous properties in certain materials and articles intended to come into contact with food
- 8.- MANFISA Aluminium wire complies with the Standard GB4806.9T2023 Food Contact Metallic Material & Article
- 9.- The aluminum is considered GRAS (generally recognized as safe) for food packaging.

- 10.- MANFISA Aluminium wire complies with the Standard Japan Food Sanitation Act (JFSA).
- 11.- MANFISA Aluminium wire complies with the Standards and Specifications for Utensils, Containers and Packages (Korean Ministry of Food and Drug Safety).
- 12.- MANFISA Aluminium wire complies with Mercosur GMC n. 46/06 and its amendment GMC n.16/20 and GMC 48/23. Also it complies with Anvisa RDC 854/2024 Resolution
- 13.- MANFISA Aluminium wire complies with French Brochure n. 1227 of JORF, Arrete of 27 August 1987 related to materials and objects in aluminium or in aluminium alloy in contact with food, products and drinks
- 14.- MANFISA Aluminium wire complies with DFI 817.023.21 Ordinance of 16 December 2016 on Materials and Articles Intended to Come into Contact with Food
- 15.- MANFISA Aluminium wire is free from PFAS in accordance with Regulation (EU) 2025/40 on packaging and packaging waste.

MANFISA WIRE ensures the suitability of the aluminium during 2 years, whenever the material is duly packed in its original packaging, and kept in a proper place free of humidity, and in a proper temperature, to avoid any kind of condensation.

MANFISA WIRE also states that the Aluminium wire is in compliance with DIN EN 573-3 Standard
